

A valuation range, rather than a single target price

Lufthansa traded at **EUR 7.71** on the valuation date. The closest available network-carrier set gives an EBITDA-based midpoint of **EUR 3.77**; the five-peer midpoint is **EUR 6.21**. These are relative indications under a reported-net-debt baseline, with incomplete harmonization of other capital claims.

EV/EBITDA set	Peers	Range (EUR)	Midpoint (EUR)
Network carriers	2	1.78 - 5.75	3.77
All peers	5	5.75 - 12.73	6.21
Low-cost carriers	3	9.47 - 13.59	12.73

Network set: observed min-max across two companies. Other sets: peer 25th-75th percentiles. Dots are medians; ranges are not confidence intervals.

Analyst interpretation

Air France-KLM and IAG provide the closer business-model reference. Low-cost peers are an explicit sensitivity: their growth, fleet ownership, leasing and business mix differ. Lufthansa also contains substantial logistics and MRO operations. EV/Revenue produces much higher indications because it ignores the target's lower EBITDA margin; it is a secondary cross-check, not an equal-weight valuation anchor.

Source inputs: company reports [1]-[12], share disclosures [13]-[18], and the saved Yahoo Finance market snapshot. Key limitations and source links follow.

Comparable-company snapshot

EURm, except multiples	LTM revenue	LTM EBITDA	Net debt	EV/EBITDA
Lufthansa	41,035	4,028	6,697	3.96x
Air France-KLM	34,155	5,204	8,376	2.19x
IAG	33,371	7,640	4,692	3.38x
easyJet	12,260	1,534	-505	3.52x
Ryanair	15,591	3,484	-2,622	5.97x
Wizz Air	5,771	1,164	5,134	5.46x

GBP inputs translated consistently at valuation-date spot FX. EBITDA definitions differ across companies. easyJet is measured at March 2026; the other financial observations are June 2026. Net debt includes leases; do not add them twice.

Corrections and disclosed differences

IAG: 4,611.67m issued shares less 241.65m treasury shares gives 4,370.02m external shares, using the latest located pre-cutoff disclosure. **Ryanair:** lease-inclusive debt less cash and term deposits gives EUR-2,621.6m, replacing rounded EUR-2,700m.

Wizz Air: explicit company-reported rolling EBITDA is EUR1,164.2m. The FY-minus-prior-quarter bridge gives EUR1,165.5m; the EUR1.3m difference remains flagged. **AF-KLM:** the revenue bridge gives EUR34,155m, but mixes original FY and IFRS18-restated interim comparatives; this remains provisional.

Enterprise-value bridge sensitivity

EV/EBITDA set	Baseline midpoint	Expanded bridge midpoint
Network carriers	EUR 3.77	EUR 3.49
All peers	EUR 6.21	EUR 4.84
Low-cost carriers	EUR 12.73	EUR 11.35

Expanded scenario adds Lufthansa net pensions 1,585 and minorities 65; AF-KLM parent perpetuals 1,268 and NCI 2,136; IAG NCI 6 (EURm). The corresponding Lufthansa claims are also subtracted in the EV-to-equity conversion. These are book proxies, not fully harmonized fair-value adjustments. AF-KLM NCI already includes subsidiary perpetuals. June balances may be changed by subsequent redemptions.

What must be explained in an interview

Why the core group is limited to two peers; how EBITDA adjustments affect comparisons; why leasing and treasury shares matter; and why the reported-net-debt baseline is incomplete. Additional diligence remains on share-count timing, AF-KLM restatement, easyJet's newer trading update and offer effects, pensions, hybrids and non-operating investments.
